Other Keywords: Microsoft Azure Security Technologies (AZ-500) certification exam (3), Microsoft Azure Security Technologies (2)

AZ-500: Microsoft Azure Security Technologies Certification Training Course

AZ-500: Microsoft Azure Security Technologies Certification Training Course Description

Everyone is migrating to the cloud, regardless of their organization type. Asset security is crucial for a business to ensure data integrity, given the rise in cybersecurity assaults and breaches worldwide. Microsoft Azure Security Technologies is the ideal method to obtain a safe cloud architecture in this regard for individuals and business teams.

Networkers Home offers the widely-acknowledged AZ-500 Microsoft Azure Security Technologies Certification Training course for individuals in the IT Security field. In this training, we will cover the skills required to create security controls, manage an organization's security posture, and detect and address security vulnerabilities. We will also explore and analyze platform protection, data and application security, identity and access security, and

security operations. You'll gain knowledge of platform protection, managing identity and access, security operations, and securing data and apps. The primary goal of this learning route is to assist students in beginning their studies for the Microsoft Azure Security Technologies (AZ-500) certification exam.

Students must be familiar with industry security standards, including multi-factor authentication, shared responsibility, and the zero trust paradigm, to participate in the AZ-500 Microsoft Azure Security Technologies Certification Training course. You must know security protocols like SSL, IPS, and VPN. Additionally, an understanding of scripting languages, Windows and Linux operating systems, and disk and data encryption techniques is necessary. You must be familiar with Azure, PowerShell, and the Command-Line Interfaces. Once these requirements have been satisfied, you can start obtaining advanced Microsoft Azure Certifications with Networkers Home, India's leading Cisco training institution.

This course is intended, but not restricted, to Azure Security Engineers who either aim to sit for the relevant certification test or regularly handle security-related duties at work. An engineer who wishes to specialize in providing security for digital platforms built on Azure and play a significant part in safeguarding an organization's data might also benefit from taking this course. The AZ-500 Microsoft Azure Security Technologies Certification Training course is the finest choice for Azure Security Professionals who want to upskill their existing knowledge and skills. Network security engineers, system engineers, IT security engineers, cloud solution architects, and cybersecurity professionals are all highly encouraged to attend.

With the conclusion of the AZ-500 Microsoft Azure Security Technologies Certification Training course, individuals will accomplish the following goals.

Specified data classes on Azure: How to characterize them

Manage Azure identities and access

Identify Azure data protection methods

Secure applications on Azure, describe Azure security features and services and implement internet protocols.

Implement enterprise governance solutions, such as resource locks, Azure policies, and role-based access control.

Establish a user, group, and multi-factor authentication architecture with Azure AD

Implement risk policies, conditional access, and access reviews as part of Azure AD Identity Protection

Manage identities in Azure Active Directory

Set up secure access using Azure AD

Regulate application access, and manage access control.

The Microsoft Azure Security Technologies (AZ-500) certification exam assesses the following concepts in applicants.

Manage identity and access (30-35%)

Implement platform protection (15-20%)

Manage security operations (25-30%)

Secure data and applications (20-25%)

Pass the Microsoft Azure Security Technologies (AZ-500) exam and get the hang of Microsoft Azure Security Technologies. Join Networkers Home's AZ-500 Microsoft Azure Security Technologies Certification Training course today!
